

# **Back to School Tutoring**

Tutoring is needed now more than ever! Reports project that with the COVID-19 crisis, students will start the year with less than 50% of the learning gains in math, and in some grades, nearly a full year behind what we would observe in normal conditions. With tutoring, students have an opportunity to reduce the effects of both the summer slide as well as Covid-19.

Students are faced with many challenges during this time. Many students have not received quality instruction since March and let's face it, many students have fallen very behind. The good news is you do not have to do this alone! We have 20 years of experience helping students reach their goals. Now, we are no longer only helping students in the surrounding towns, we now have students all over the world. We are ready and willing to you through this. We want to see our students succeed! Allow us to help you through this!

This fall we are offering the following programs:

One on One Tutoring - In-Person and Online

Small Group Tutoring - In Person and Online

Little Reading Rockets Program - Online Only

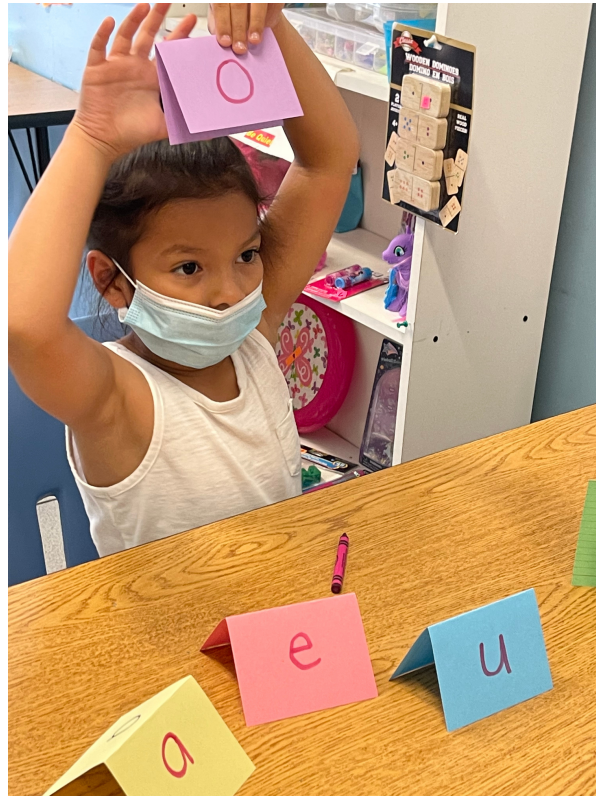

## **One on One Tutoring**

We find that there is no better way to help our students than to provide them with undivided and individualized attention from one of our highly qualified tutors. After meeting with and assessing your child, we will prescribe a program that fits their specific needs and focuses on the his or her areas of weakness. We will identify gaps that may have been caused by COVID and work to close the gaps while moving your child forward. We can incorporate any content being taught in school into your child's program. We will communicate with teachers to form a united team for your child's success. This program can be administered in person or online.

## Small Group Tutoring

We offer small group sessions in which we pair your child with one of our tutors. These small group sessions are offered in person. The sessions are limited to a maximum of 1:3 ratio in person. Each session consists of the student receiving personal individualized instruction based on their areas of weakness as well as guided independent learning. During these sessions the students are seated socially distanced to help protect everyone against the spread of COVID19.

# **Little Reading Rockets Program (Online Only)**

Since 2006, SCA Tutoring, has provided highly effective reading and spelling remediation for struggling readers. Our tutors are trained to integrate the Orton Gillingham technique to help our students overcome their reading struggles. This class is ideal for students who need to build or solidify their knowledge of phonics to improve their overall reading. Students should have a prior knowledge of basic phoneme/sounds. In this class students will develop their skills in: phonics, decoding, blending, syllabication, spelling, etc.
